

Recommended Introduction Courses Medical Reserve Corps Camden County and Gloucester County On-line Training Options 2011

Dear MRC Volunteers,

Here is a list of on-line course options you may use if you have not had a chance to take these classes at our in person trainings in the past. Some courses are offered at the New Jersey Learning Management Network at <https://njlmn.rutgers.edu/>. Once registered, the transcripts will be kept on-line and some professional development credits may be received for these. If you sign in onto NJLMN, under the top there is a green strip with your name, click on transcripts and this will show your complete courses with credits received. If you need help navigating this system please contact Monique Bussell at 856-374-5127 for Camden County residents or Carla Kephart at 856-218-4106 for Gloucester County residents. If you prefer to take these courses at another web-site due to credits options you are seeking or length of course, you may do so but make sure to make a copy of certificate and mail it into the MRC Coordinator for your county.

Strategic National Stockpile (SNS) Course for Nurses or MRC Volunteers

<https://njlmn.rutgers.edu/>

Resources:

<http://www.bt.cdc.gov/coca/continuingeducation.asp> The CDC Emergency
Communication System's Clinician Communication Team manages COCA (Clinician
Outreach Communication Activity). This is great website that offers conference calls and
online webinars. It provides **free continuing education credits** for medical/health
educators/pharmaceutical practitioners for most courses.
